

Glycerin Soaps

Our colorful, handcrafted 100% vegetable glycerin based soaps are made in small batches and are free of synthetic chemicals.

Glycerin, used on all types of skin, is gentle and non-toxic in nature. It is a humectant that absorbs and retains moisture, hydrating for soft and healthy-looking skin.

Good for people with dry or sensitive skin.

The first recorded evidence of soap making, made with boiled fats and wood ash, dates back to around 2800 BC in Ancient Babylon. In London 1798, the world's first glycerin translucent soap was created.

The Full Bloom Glycerin Soap Collection contains a variety of Herbs, Botanicals, Essential Oils and Essences. Perfume oils derived from natural substances.

“What is elegance? Soap and water!”

– Cecil Beaton
